

Dad's Program – Terrarium Making!

18th November 2017, 10.30am – 12.30pm @ Clementi Primary School

Fathers make a difference. Through this program, children benefit to have better academic skills, have lower at-risk behaviours and grow up more emotionally stable. For fathers, they will be more satisfied with their marriages, their lives and enjoy closer father-child bonds and are more satisfied. The aim of this activity is to promote Father-Child Bonding to inspire, mobilise and involve fathers to become good influencers in their children's lives for life.

Overview:

- Enhance relationships between yourself, your children and your partner.
- New parenting strategies.
- Alternative strategies to angry outbursts and power-based parenting.

Terrarium Activity

Terrarium is a trendy, fun and green-fingered activity with no acreage required. Having a mini indoor garden in a glass container, it helps to add a bit of outdoor beauty and peace to any living space. Parents and child are able to bond through this activity to enjoy a slice of nature around them, to be away from electronic gadgets, to be environmentally aware and to hone their green thumb. This activity encourages families on lifelong appreciation for Mother Nature. And through the interaction from making terrarium, mood is lifted, creativity is boosted and parent-child relationship is enhanced.

Open to first 30 pairs. Sign up now!

Join in our 2-hrs session. Admission is Free !

REGISTER NOW – programme registration is open until 15th November 2017
