Dear Parents/Guardians,

Water Conservation Campaign 2017

We have just launched a three-month long campaign to save water. The objectives of this campaign are to educate Clementians on the current and future water challenges that Singapore faces and to encourage them to adopt some good habits to conserve water.

Water is a scarce resource in Singapore. Our country faces many challenges to provide enough water to meet the rising demands of our people. Land has been freed up for water catchment areas and our government is investing in more desalination and NEWater plants. However, these efforts may not be enough if we do not make an effort to reduce water usage. We believe our pupils can and should do their part to prevent water wastage in school and at home.

Clementians have been taught various ways to reduce water usage. To help them draw relevance to authentic experiences in life, we would like to partner you in a parent-child activity. You are strongly encouraged to work with your child/ward on the following:

1) Compare the latest utilities bill with the next two months

Pupils will compare the latest utilities bill with bills in the following months, ie May and June, to see if their water conservation efforts at home have been effective.

2) Share how you and your family members participated in the campaign

You can include a picture of you and your child/ward adopting water-saving habits with captions written by your child in the activity sheet provided.

We look forward to receiving your innovative water-saving tips that your family have adopted.

Thank you for your partnership in this campaign!

Yours sincerely,
Mrs Jennifer Chan
HOD/CCE
